## Free standing structures

WALT: explore freestanding structures in the local environment.

Today we would like you to go to the park and explore the different free standing structures (swings, slides etc). If you can't go to the park, you could research different structures that are found at most parks or think about the structures we have at school on our timber trail (play equipment).

Have a discussion with your grown up and answer these questions::

**What are the structures called and what is their purpose?**

**Who might use them?**

**What materials have been used?**

**Why have these been chosen?**

**How have the parts been joined together?**

**How have the structures been made strong enough?**

**How have they been made stable?**
