

ELLI

The Learning Story

Reddal Hill Primary School

Bear wanted a new home

Bear knew there were caves in the mountains, but that it was tricky to reach them. He spoke to his friend ELLI about it, she said that she knew some animals who might be able to help.

As they set off on their journey, ELLI said “The first person we need to talk to is my friend Ollie the Owl because she flies high in the sky, and can tell us the best route to take.”

Ollie the Owl helped them to see that by knowing how to get over obstacles in their path they would reach their destination safely.

Owls are aware of their feelings, thoughts and ideas for doing things differently in their learning.
They have a toolkit of strategies they use for different situations and take time out to think about them.
Ollie the Owl like to plan and manage the learning process

The animals came to the edge of a forest and Chamy the Chameleon came down from a tall tree. Bear hadn't noticed him before, because he had been the same colour as the tree. But now he was bright red. ELLI spotted him too and said "You are so good at getting used to new things, you can help us."

Chamy the Chameleon replied "You need to know that you can change and learn things wherever you are on your journey. I never get stuck. I can always change my colour and get used to new things."

Chameleons know that they can get better at learning over time. They believe that through effort their minds can get bigger and stronger just as their bodies can.

Chamy the Chameleon learns and changes over time.

After a while they were tired and thirsty. Bear wanted to go home. Luckily, they came to a river where they had a drink. As they drank they talked about how they would cross the running water.

ELLI thought of another friend of his, Jasper the Unicorn. He always had good ideas and would be able to think of a way to get over the river. They looked into the sky and saw Jasper flying towards them.

"I give you the gift of creativity and imagination so you can think of new ways of solving problems," said Jasper the Unicorn.

"Thank you," said Bear. Then Jasper flew back into the sky.

Unicorns like to look at things in different ways, to find another angle. They are playful with ideas and like to use their imagination and inklings which bubble up in their minds.

Jasper the Unicorn is creative, playful, imaginative and intuitive.

"Shall we make a raft? Or a bridge?" said Bear, "Or a hot-air balloon? Or maybe a canoe?"

"Let's make a raft," said ELLI. "We can tie branches together with vines." Soon the raft was finished. They put it in the water, and climbed onto it, but then it broke and started to sink.

"We need help from another of my friends. He is called Topol the Tortoise." said ELLI.

"Hello Topol," said ELLI. "Bear and I are trying to get across this big river. We made a raft but it broke. What should we do?"

"What you need," said Topol the Tortoise "Is to keep on trying. Some people call this 'stickability'. It means that you *stick* to what your doing and don't give up."

The Tortoise likes a challenge and is willing to have a go, even when they are finding things tricky. They accept that learning is sometimes hard for everyone and that to get something wrong is OK.

Topol the Tortoise relishes challenge and perseveres.

ELLI and Bear remembered all the gifts they had been given. "We can do this," they said. They rebuilt the raft, planning carefully the amount of logs they would need and how to tie them together. Soon the raft was finished and they sailed to the other side of the river.

As it grew dark, they came to a huge hole between them and the mountains. None of the gifts they had been given so far could help them get over this massive hole.

"I need to introduce you to two more of my friends," said ELLI. "They are, Charlie the Cat and Sammy the Spider."

She called their names and both of them came into view. "We are trying to get to the mountains so that Bear can find a new home," said ELLI. "But we have come to this hole, and we don't know how to get across."

Charlie the Cat stretched and said, "You must be more curious about the problem. If you ask the right questions you will find exactly how big the problem is, and then you will be able to use Unicorn's gifts of creativity to find a way of solving it."

Curious Cats like to find things out, to get to the bottom of things and find out what is really going on. They like to ask the question WHY?

Charlie the Cat is always curious to get beneath the surface and find out more.

“Also,” said Sammy the Spider “You need to link your ideas together to make connections inside your head.”

Spiders are on the look out for connections between what they are learning and what they already know — from life experiences or earlier learning. They like to see how things fit together.

Sammy the Spider finds meaning and make connections, just like your background knowledge when reading.

The background of the entire image is a light gray surface covered with numerous spider webs of different patterns and sizes. Some webs are circular, while others are more irregular or spiral-like. The webs are drawn with thin, white lines.

Bear and ELLI sat down and began to use the creativity of unicorn to make a clever plan. They collected all of the spider webs from the trees and rocks around them, and wove them together to make a strong catapult. They set the catapult up next to the hole, and were ready to be thrown across it when they realised that they needed some more help.

“We need the last of my friends, the Bees,” said ELLI. “They are good at working together in a team.” A swarm of bees came from around the corner.

ELLI told them that they needed some help to catapult themselves across the hole. The Bees agreed to help.

“Thank you,” replied Bear and ELLI. “The Bees pulled back the catapult working as a team and soon Bear and ELLI were on the other side of the hole. The Bees waved goodbye as they gathered into a swarm and flew away.

Bees like to work with other people, learning from them and learning with them. They can learn on their own too. Bessy the Bee learns with and from others as well as alone.

Bear and ELLI had all the tools they needed to get Bear a new home.

By morning he was settled into his new cave in the mountains.

He knew all he had learnt from ELLI's friends would be useful to him again and he felt very thankful!
