Instructions

WALT: write an instructional text

3 stars: use the new modelled text below to write your set of instructions. Use your plans from yesterday to help when you are changing the words in red. I can't wait to read your instructions!

How to Catch a rabbit

You Will Need:

- a box
- some string
- a fresh crunchy carrot
- a blanket

What to Do:

1. First, make a small hole in the box and push the string through.
2. Then, tie the string in a knot and place the box outside.
3. After, place the fresh crunchy carrot underneath the box.
4. Lastly, pull the string hard to knock the box down onto the rabbit and scoop the rabbit in the blanket.

A Final Note of Warning:

Be careful and don't stoke it!
