Subtraction

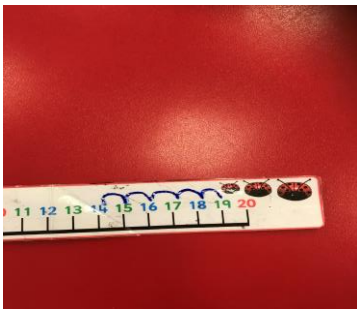

WALT: solve subtraction word problems.

To complete the word problems you can use the ten bus frames or number lines to support. Remember to write the number sentence for each word problem. See Example

There were 19 ducks but 5 swam away.
How many are left?

Example- $19 - 5 = 14$

There were 11 dogs but 5 ran away.
How many are left?

There were 16 birds but 4 flew away.
How many are left?

There were 18 cows but 5 walked away.
How many are left?

There were 17 fish but 6 swam away.
How many are left?

There were 20 cats but six ran away.
How many are left?
