

WALT: produce an acrostic poem to understand about water conservation.

Geography

Why is water so important in

our everyday lives??

How could we save more water?

Washing Machines

Did you know that a full load in a washing machine uses 65 litres of water.

However, a half-load is not very economical as it uses more than half the water of a full load.

Solution

Try and wait until you have a full load before you wash your clothes.

Flushing the Toilet

Did you know that every time you flush the toilet 2.5 litres of water is used?

According to the World Toilet Organization (WTO), the average person uses a toilet 2,500 times year, or six to eight times a day.

Solution

Some water-saving bag devices can be used in the cistern to save water.

Filling a Bath

Did you know that just having one bath uses 80 litres of water! While a short shower can use as little as a third of that amount.

Solution

So try and take showers more often than a bath.

But when you do have a bath, you can minimise your water use by reusing your bathwater to water your houseplants or garden.

Geography

A Dripping/Running Tap

Did you know that a dripping tap can waste up to 4 litres of water a day?

If you leave the tap running it wastes 6 litres per minute, so turning the tap off when brushing can save around 12-18 litres every time you brush your teeth.

If every adult in England and Wales remembered to do this, we could save 180 mega litres a day - enough to supply nearly 500,000 homes.

Solution

When you are brushing your teeth try and turn off the tap.

REDUCE
REUSE
RECYCLE

Should we throw it?

WALT: produce an acrostic poem to understand about water conservation.
