Multiplication

WALT: use standard method to solve multiplication questions in the two times table.

Activity 1: Start with zero and count in your two's. Colour in the two times table on the grid below.

1	2	3	4	5
6	7	8	9	10
11	12	13	14	15
16	17	18	19	20
21	22	23	24	25

Use the table above to help you complete these number facts for the 2 times table.

$1 \times 2 = \underline{\quad\quad}$

$2 \times 2 = \underline{\quad\quad}$

$3 \times 2 = \underline{\quad\quad}$

$4 \times 2 = \underline{\quad\quad}$

$5 \times 2 = \underline{\quad\quad}$

$6 \times 2 = \underline{\quad\quad}$

$7 \times 2 = \underline{\quad\quad}$

$8 \times 2 = \underline{\quad\quad}$

$9 \times 2 = \underline{\quad\quad}$

$10 \times 2 = \underline{\quad\quad}$

$11 \times 2 = \underline{\quad\quad}$

$12 \times 2 = \underline{\quad\quad}$

Example: 34×2

1. Set your question out clearly.
2. Start with the ones column. ($4 \times 2 = 8$)
3. Then look at the tens column. ($3 \times 2 = 6$)

	T	O	
	3	4	
×		2	

	T	O	
	3	4	
×		2	
		8	

	T	O	
	3	4	
×		2	
	6	8	

Now it is your turn.

	T	O	
	2	4	
×		2	

	T	O	
	2	4	
×		2	

	T	O	
	4	4	
×		2	

	T	O	
	3	1	
×		2	

Set these ones out yourself.

32 x 2

41×2

21 x 2

$$43 \times 2$$

Activity 3: Complete these questions using standard method. (Don't forget your soldiers carrying.)

Step 1: Set out your questions clearly.

Step 2: Multiply the ones column. ($9 \times 2 = 18$)

Placing the 10 in the tens column.

Step 3: Multiply the tens column ($1 \times 2 = 2$)

Adding the 1 underneath to make 3.

	1	9	
x		2	
	3	8	
	1		

26×2

37×2

45×2

38×2

48×2

53×2

64×2

76×2
