

WALT: add using dienes. (Crossing tens)

Use your dienes and rods to add these numbers together. You will need to count into the next lot of 10. I have to count on from 17 and I go passed 20. Represent your numbers first and then count your tens followed by your ones.

EG $17 + 15 = 32$

$18 + 8 = 26$	$19 + 9 = 28$
$28 + 6 = 34$	$39 + 5 = 44$
$18 + 13 = 31$	$29 + 14 = 43$
