

WALT: add using dienes. (Crossing tens)

Use your dienes and rods to add these numbers together. You will need to count into the next lot of 10. I have to count on from 17 and I go passed 20. Represent your numbers first and then count your tens followed by your ones.

EG $17 + 15 = 32$

$29 + 23 = 52$	$38 + 17 = 55$
$49 + 13 = 62$	$39 + 24 = 63$
$68 + 24 = 92$	$49 + 38 = 87$
