

WALT: find number facts to 10.

Fill in the missing number to complete the number bond to 10. Count on from the number you are given until you reach 10. Use your fingers to help you.

Once you have completed the number bonds, re-write them so that they are still correct, using the same 3 numbers for each one.

e.g $6 + 4 = 10$ $4 + 6 = 10$

1) $6 + 4 = 10$ $4 + 6 = 10$

2) $7 + 3 = 10$ $3 + 7 = 10$

3) $8 + 2 = 10$ $2 + 8 = 10$

4) $5 + 5 = 10$

5) $1 + 9 = 10$ $9 + 1 = 10$

6) $10 + 0 = 10$ $0 + 10 = 10$

7) $4 + 6 = 10$ $6 + 4 = 10$

8) $2 + 8 = 10$ $8 + 2 = 10$

9) $3 + 7 = 10$ $7 + 3 = 10$

10) $0 + 10 = 10$ $10 + 0 = 10$

WALT: find number facts to 20.

Fill in the missing number to complete the number bond to 20. Count on from the number you are given until you reach 20. Use your fingers to help you.

Once you have completed the number bonds, re-write them so that they are still correct, using the same 3 numbers for each one.

E.G $17 + 3 = 20$ $3 + 17 = 20$

1) $6 + 14 = 20$

$14 + 6 = 20$

2) $7 + 13 = 20$

$13 + 7 = 20$

3) $8 + 12 = 20$

$12 + 8 = 20$

4) $5 + 15 = 20$

$15 + 5 = 20$

5) $1 + 19 = 20$

$19 + 1 = 20$

6) $10 + 10 = 20$

7) $14 + 6 = 20$

$6 + 14 = 20$

8) $12 + 8 = 20$

$8 + 12 = 20$

9) $13 + 7 = 20$

$7 + 13 = 20$

10) $0 + 20 = 20$

$20 + 0 = 20$

WALT: find number facts to 20.

Fill in the missing number to complete the number bond to 20. Count on from the number you are given until you reach 20. Use your fingers to help you.

Once you have completed the number bonds, re-write them so that they are still correct, using the same 3 numbers for each one. However, turn the sum into a subtraction sum instead of an addition sum. If you have completed the 2 star sheet, you do not need to complete all of the number bonds again.

E.G $17 + 3 = 20$ $20 - 17 = 3$

$$1) 6 + 14 = 20 \qquad 20 - 14 = 6$$

$$2) 7 + 13 = 20 \qquad 20 - 13 = 7$$

$$3) 8 + 12 = 20 \qquad 20 - 12 = 8$$

$$4) 5 + 15 = 20 \qquad 20 - 15 = 5$$

$$5) 1 + 19 = 20 \qquad 20 - 1 = 19$$

$$6) 10 + 10 = 20 \qquad 20 - 10 = 10$$

$$7) 14 + 6 = 20 \qquad 20 - 6 = 14$$

$$8) 12 + 8 = 20 \qquad 20 - 8 = 12$$

$$9) 13 + 7 = 20 \qquad 20 - 13 = 7$$

$$10) 0 + 20 = 20 \qquad 20 - 0 = 20$$
