

Science

Aim

- I can retrieve information linked to electricity.

Success Criteria

- I can produce a 'brain dump' from the knowledge that I have acquired about electricity
- I can research additional information linked to electricity.

Electricity

WALT: retrieve information linked to electricity.

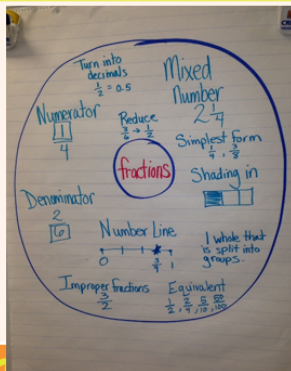

Science

To make sure we remember a range of information, we need to retrieve it from our memory.

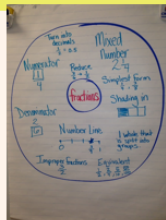

When we learn something, it goes into our short term memory, but in order to remember it for a long time, we need it to move to our long term memory.

Let's do a 'brain dump'!

On the 'Brain Dump' worksheet, you need to write down everything you have learnt so far in our topic of electricity!

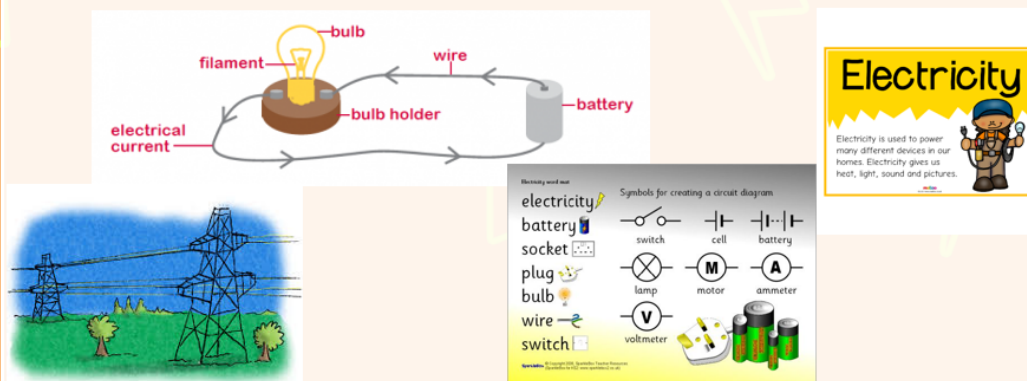

- *Electricity Safety
- *Making a circuit
- *Circuit Symbols
- *How to make a burglar alarm etc.

If you need to, go back to the previous weeks on the website to remember the Science lessons!

Science

Now that we have completed our 'Brain Dump' from what we can remember from before half term, we are now going to try and add to it by researching additional information about electricity. See what you can find out about! Use the research worksheet to write down your new facts and research!

EXT...

Using the research that you have already found out, can you think of any other questions that you would like answering about electricity?
