Measurement

WALT: Solve length word problems.

Read the word problem. Identify the length of the first number. Add the second number to find the answer. Bonus Challenge-These numbers are higher than the length of a ruler.

Two digit number addition.

Fred's car was 40cm long. Tim's car was 11cm longer. What was the length of Tim's car?

Example-

$$40\text{cm} + 11\text{cm} = 55\text{cm}$$

Sandra's pencil was 34cm long. Ruby's pencil was 15cm longer. What was the length of Ruby's pencil?

Imran's book was 49cm long. Kim's book was 15cm longer. What was the length of Kim's book?

Rose's cushion was 57cm long. Stella's cushion was 14cm longer. What was the length of Stella's cushion?

Bill's truck was 55cm long. Ben's truck was 18cm longer. What was the length of Ben's truck?

Shanice's stick was 66cm long. Esther's stick was 17cm longer. What was the length of Esther's stick?
