Number

WALT: estimate numbers

Today we are estimating numbers by using rounding. Let's recap how to round numbers.

If we are rounding to the nearest 10, we look at the ones column.

1      2      3      4      5      6      7      8      9

These numbers would be rounded to the 10 before. These numbers would be rounded to the 10 after.

E. g The number 17 comes between 10 and 20. The 7 gets rounded to 20

a) 17 ~ 20

Activity 1:

(Hint: to help work out the 10 that comes before or after use the 100 square from yesterday)

- |        |        |
|--------|--------|
| 1) 11~ | 5) 19~ |
| 2) 31~ | 6) 49~ |
| 3) 21~ | 7) 29~ |
| 4) 41~ | 8) 59~ |

Activity 2:

- 1) 63~
- 2) 77~
- 3) 33~
- 4) 74~
- 5) 85~

Activity 3: (Remember we are looking at the tens column today)

- 1) 122~
- 2) 167~
- 3) 145~
- 4) 198~
- 5) 236~
