

Read these paragraphs then match the headings to the paragraphs

Tigers are a species of big cat. In fact they are the biggest type of cat! They live in Asia.

Tigers have distinctive black stripes on their orange fur, however, some tigers are white. No two tigers have the same pattern of stripes.

They can be over 3 metres long and weigh about 300kg. When they run they can reach speeds of 40 miles per hour!

There are five subspecies of tiger. Different subspecies of tiger include Bengal, Siberian and Sumatran. Unfortunately three subspecies have already become extinct.

Introduction

Read these paragraphs- what could the subheading be?

Tomatoes are a fruit. They grow on a tomato plant and come from South America. They include lots of vitamins and minerals that are good for us.

Tomatoes originate from Peru. They were first eaten by the Aztecs in Mexico. Today tomatoes are grown around the world. In cooler countries they are grown in greenhouses.

All sorts of delicious recipes can be made using tomatoes. They can be turned into soups and stew, sauces or put in salads. They can be eaten raw or juiced to make a drink.
