Measurement

WALT: measure capacity.

Starter:

This week we have
been
looking at
capacity!

Who can remember what it means?

Keywords

full

empty

nearly empty

half full

half empty

cup

jug

container

measure

capacity

Today we are going to be measuring capacity!

We are going to use cups as our unit of measurement. e.g. the jug = 5 cups

What items' capacity could we measure?

It is really important when measuring capacity that our unit stays the same.

So if you are using a cup, you must use the same cup!

Big bowl= _____cups

Small bowl= _____cups

Mug=

The _____ has more capacity than the _____.

Extension

Put these in order from empty to full.

A

B

C

D

empty

full
