

WALT: subtract using dienes

Draw your dots to represent the first number in the sum. Then cross out the amount of the second number in the sum. EG $5 - 4 =$ draw 5 dots and cross out 4 of them. Then count how many are left.

If a number is over 10 then you will need to use a rod to represent your tens.

$5 - 4$	$6 - 3$	$7 - 2$

$9 - 4$	$8 - 6$	$7 - 5$

$13 - 2$	$16 - 3$	$17 - 4$
