

WALT: re-write number sentences.

Use the inverse operation to check these sums. Change an addition sum to a subtraction sum. A subtraction sum will always have the biggest number at the start. This sheet starts with a subtraction sum, this means you will need to change it to be an addition sum. An addition sum always has the biggest number at the end.

EG. $5 + 4 = 9$ $9 - 5 = 4$

$7 - 3 = 4$	$15 - 10 = 5$
$26 - 4 = 22$	$36 - 15 = 21$
$46 - 25 = 21$	$69 - 43 = 26$
