Measures- Time

WALT: measure time in seconds

Seconds- Today we will be measuring how long it takes to complete different activities in seconds. These are all practical activities so make sure that you have enough space to complete them safely. We would love to see some photographs of you completing your activities so don't forget to send them to the class email page.

Activity 1: Start your timer, then close your eyes. Wait for 60 seconds (1 minute) then open your eyes and stop the timer. How close were you to getting 60 seconds? Repeat this activity two more times, can you get any closer?

Attempt number	Length of time
1	
2	
3	

Which attempt was your best (closest to 60 seconds)? _____

Activity 2: Ask everyone in your bubble to stand on their leg with their eyes closed for as long as they can. Record the times of each persons go, then order them from the longest to the shortest. (if no-one else is available, repeat it yourself.)

Name of person	Length of time

Order from longest to shortest:

Activity 3: Estimate how many seconds you think it will take to complete each activity, then complete the activity. How close was your estimate, work out the difference by subtracting the smaller number from the larger number. Once you have completed the first 4 activities, come up with 2 of your own.

Activity	Estimate	Actual	Difference
20 star jumps			
Link 10 paper clips			
Write the word 'seconds' 20 times			
Order a set of 25 number cards from smallest to largest
