

WALT: find number facts to 100

Fill in the missing number to complete the number bond to 100. Once you have completed this, re-write the sum using the same 3 numbers so that it is still correct.

EG $20 + 80 = 100$ $80 - 20 = 100$

1) $80 + 20 = 100$

2) $30 + 70 = 100$

3) $50 + 50 = 100$

4) $20 + 80 = 100$

5) $10 + 90 = 100$

6) $60 + 40 = 100$

7) $0 + 100 = 100$

8) $40 + 60 = 100$

9) $70 + 30 = 100$

10) $90 + 10 = 100$

$20 + 80 = 100$
$70 + 30 = 100$
$80 + 20 = 100$
$90 + 10 = 100$
$40 + 60 = 100$
$100 + 0 = 100$
$60 + 40 = 100$
$30 + 70 = 100$
$10 + 90 = 100$

WALT: find number facts to 100

Fill in the missing number to complete the number bond to 100. Once you have completed this, re-write the sum using the same 3 numbers so that it is still correct. However, change the sum into a take away sum rather than an addition sum

EG $20 + 80 = 100$ $100 - 20 = 80$

1) $80 + 20 = 100$

2) $30 + 70 = 100$

3) $50 + 50 = 100$

4) $20 + 80 = 100$

5) $10 + 90 = 100$

6) $60 + 40 = 100$

7) $0 + 100 = 100$

8) $40 + 60 = 100$

9) $70 + 30 = 100$

10) $90 + 10 = 100$

$100 - 20 = 80$
$100 - 30 = 70$
$100 - 50 = 50$
$100 - 80 = 20$
$100 - 10 = 90$
$100 - 60 = 40$
$100 - 0 = 100$
$100 - 40 = 60$
$100 - 70 = 30$
$100 - 90 = 10$

WALT: find number facts to 100

Squares are worth 10

Triangles are worth 20

Circles are worth 30

Can you complete the grid below so that all horizontal and vertical lines equal 60?

Solution
