Addition and Subtraction

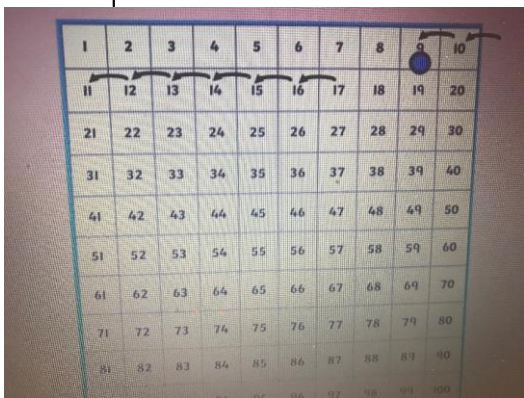

WALT: solve addition and subtraction word problems.

To complete the word problems you can use a 100 square to support.

Remember to write the number sentence for each word problem.

Ben had 17 sweets. He gave Tom 8.
How many sweets does Ben have left?

Example- $17 - 8 = 9$

Sam had 12 apples and Jack gave him 6 more. How many does Sam have altogether?

Fran had 11 apples and Pip gave her 8 more.
How many does Fran have altogether?

Alisha had 8 sweets. She gave Bert 6.
How many sweets does Alisha have left?

Alice had 10 sweets. She gave Tim 9.
How many sweets does Alice have left?

Desmond had 11 apples and Bill gave him 5 more.
How many does Desmond have altogether?
