

Addition and Subtraction

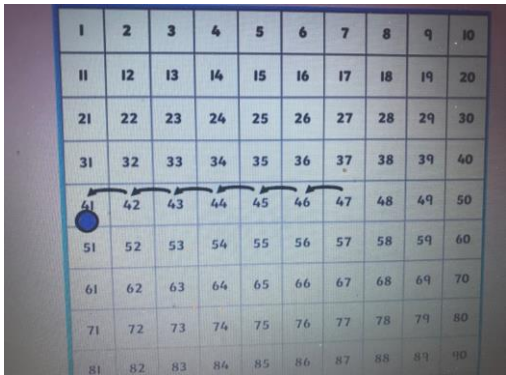

WALT: solve addition and subtraction word problems.

To complete the word problems you can use a 100 square to support.

Remember to write the number sentence for each word problem.

Ben had 47 sweets. He gave Tom 6.
How many sweets does Ben have left?

Example- $47 - 6 = 41$

Sam had 37 apples and Jack gave him 6 more. How many does Sam have altogether?

Fran had 38 apples and Pip gave her 8 more. How many does Fran have altogether?

Alisha had 42 sweets. She gave Bert 6. How many sweets does Alisha have left?

Alice had 36 sweets. She gave Tim 9. How many sweets does Alice have left?

Desmond had 41 apples and Bill gave him 9 more. How many does Desmond have altogether?
