Addition and Subtraction

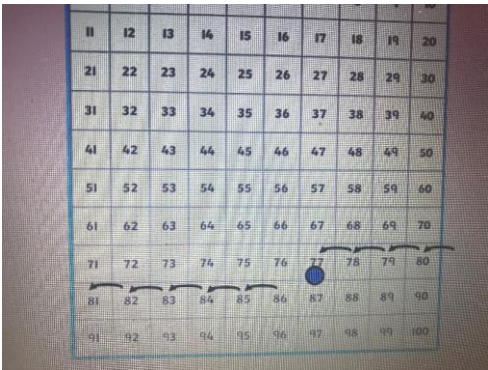

WALT: solve addition and subtraction word problems.

To complete the word problems you can use a 100 square to support.

Remember to write the number sentence for each word problem.

Ben had 86 sweets. He gave Tom 9.
How many sweets does Ben have left?

Example- $86 - 9 = 77$

Sam had 77 apples and Jack gave him 11 more. How many does Sam have altogether?

Fran had 68 apples and Pip gave her 12 more. How many does Fran have altogether?

Alisha had 82 sweets. She gave Bert 12. How many sweets does Alisha have left?

Alice had 100 sweets. She gave Tim 13. How many sweets does Alice have left?

Desmond had 88 apples and Bill gave him 12 more. How many does Desmond have altogether?
