

Today we are going to be
using number lines to take
away.

$$12 - 2 =$$

To work out this question, I need to:

1. Find 12 on the number line and circle it
2. Take 2 jumps backwards (to the left)
3. Circle the number I land on (that is my answer)

$$18 - 5 =$$

To work out this question, I need to:

1. Find 18 on the number line and circle it
2. Take 5 jumps backwards (to the left)
3. Circle the number I land on (that is my answer)

$$19 - 4 =$$

To work out this question, I need to:

1. Find ___ on the number line and circle it
2. Take ___ jumps backwards (to the left)
3. Circle the number I land on (that is my answer)
