

WALT: compare numbers.

Look at the problem. Use the $<$ $>$ or $=$ sign to tell you whether the crocodile will eat the number on the left or the right. Fill the gap.

$$15 > \underline{\quad\quad} < 8$$

$$29 = \underline{\quad\quad} = 29$$

$$37 < \underline{\quad\quad} < 39$$

$$46 = \underline{\quad\quad} > 59$$

$$54 > \underline{\quad\quad} > 22$$

$$39 < \underline{\quad\quad} = 91$$
